

What's New *for* 2020

Pradia™ Insecticide

A combination of two unique insecticides that provides both contact and systemic activity, quick knockdown of insect pests and 3 to 4 weeks of residual activity. Pradia contains cyclaniliprole and flonicamid in a soluble concentrate formulation used as a foliar spray or srench. Pradia delivers quick knock-down (48 hours) and excellent long-term control (up to 28 days) of problem insects such as aphids, thrips and whiteflies. **Available now.**

Sarisa™ Insecticide

Contains a novel active ingredient that acts through contact and ingestion and provides quick knock-down of target pests and up to 3 – 4 weeks control of Thrips, caterpillars, and beetles (including flea and Japanese beetles), along with other sucking and chewing insects. **Available now.**

Fuerte™ Ornamental Herbicide

A pre-emergent granular herbicide for control of weeds in field, container and landscape ornamentals, grounds maintenance, and non-cropland areas. Also for Christmas tree farms, conifer farms and other label specified non-crop areas. Contains the active ingredients flumioxazin and prodiamine formulated on an engineered granule that provides an unprecedented level of dust reduction for improved worker safety and ease of application. **Available now.**
